SUMMARY

Creative Frontend Engineer with **7+ years** of experience in web and mobile development. Proficient in **React**, **React Native**, and various other modern technologies. Adept at working across diverse projects and delivering **high-quality** solutions for different clients. Seeking opportunities to bring my **experience** into use and solve complex problems in collaborative environments.

WORK EXPERIENCE

Frontend Engineer | Toptal | November 2022 - Present | Remote

Current client | React

- Led the redesign of platform reports, improving both the aesthetic and **performance** for **hundreds** of clients.
- Rebuilt account settings, accommodating both legacy and new features through multiple iterations.
- Developed **highly** requested features including content approval, messaging system, onboarding, and others.

ClassDojo | React Native

- Migrated components from the previous tech stack to **React Native**, updating features to achieve parity with iOS counterparts.
- Built new functionalities related to **account management**, enhancing user control over settings.

BCG Gamma | Next.js

- Developed graph and form components for a **data workflow dashboard** with complex states and processes, ensuring critical deliveries on time.
- Leveraged previous experience to heavily customize and integrate **charts** into the dashboard.
- Optimized performance for handling **large datasets**, ensuring smooth operation of lists and charts.

Frontend Engineer | TimeJobs | June 2021 - October 2022 | Remote

- Developed web internal dashboard for handling **hundreds** of daily operations and users.
- Led the mobile team in building a hybrid customer-facing app, downloaded over **100k** times.
- Implemented features for job applications, attendance monitoring, ratings, and skill acquisition.

Full-stack Freelance Engineer | Self-employed | January 2020 - June 2021 | Remote

- Developed custom websites and mobile apps for various clients using **AWS** and **Digital Ocean** for deployment.
- Built projects including landing pages, blogs, school intranets, and internal dashboards.
- Implemented complex features such as customized charts, filtered tables, and multi-step forms.

Full-stack Developer | Mindtec | January 2017 - December 2019 | Peru

- Worked in a **fast-paced** environment, focusing on shipping features and meeting client requests.
- Gained experience with various tech stacks and **real-world** application development scenarios.

SKILLS

- **English** (C2), Spanish (Native)
- **Languages:** JavaScript, TypeScript, HTML, CSS, Kotlin, Java, PHP, Dart
- **Frameworks/Libraries:** React, Next.js, Svelte, Cypress, Jest, Tailwind CSS, Express, Koa, Laravel
- **Mobile Development:** Flutter, Android, React Native
- **Others:** MongoDB, AWS, Digital Ocean, Resend, Supabase

PERSONAL PROJECTS

- **Zeta Launcher** - Custom Android launcher with over **50k** downloads and **600** daily active users.
